Project Design Phase-1 Problem-Solution Fit

Team Id	PNT2022TMID25917
Project name	Containment Zone Alerting Application

Who is your customer?

- **1.**Users in the world.
- **2.**Hospital check processing.

Explore limitation to buy

1.Litrarure search was conducted with a limited number of bibliographic

Different from competitors

- **1.**Installation and ease of usability.
- .

Focus on problem

1.Understand the relevant information to be useful for user.

Cause of problem

1.Unrealistic expection un relable estimate, internal issue.

Existing behaviour

1.System architect that aims to revoluction's methods for synthesing evedence in real time and generate new insite.

Design triggers

1.Identifying evaluating cretaria for evaluating and selecting the generator solution.

Solution guess

1.Monitoring,detection,da ta assessment, data analysis, predication ,informing.

Where our customer

1.Public users **2.**socio healthcare centers.

Adding emotions

1.Anxiety, affective empathy, acceptance of lockdown, distress, depression.
